

VARIOUS BOAT CASTING TACTICS

Aquila

Aquila / Boat Casting

Aquila Boat Casting

Spanish mackerel / Bonito / Kingfish / Yellowtail / Yellowfin Tuna

In our lineup of Aquila are 11 models. We have categorized them into four different series, ST, MLT, MST and EX.

The ST series are the most standard models, which are well balanced and fine honed to cater for various situations and various targets.

The MLT series have a combination of a flexible tip section and a stiff butt section to go after massive fish with light line. The MST series are the already popular models to go after monstrous Kingfish with sheer power and strength. The EX series are 3 piece pack rods for anglers traveling around the world.

The Aquila series are rods built to defy the boundaries of fishing. It was our quest to seek lifting power, easy handling of lures, outstanding castability and last but not least, the ability to parry the angry fish.

We don't simply make rods with "power", we make rods with "strength".

Aquila MST / MONSTER

The Aquila MST series have been designed for those anglers with their sights on monstrous Kingies. The main purpose of these rods are to enable anglers to go head to head with supersize fish with the use of strong PE7-8 class line and large lures for situations when the targets are feeding on large bait fish like, dorados, needle fish, flying fish etc. These rods are not just a stiff stick with power. On the contrary, in order to deal with sudden dives of the Kingfish, they have been designed with the bending point to transfer towards the angler as more load is applied to the blank. It is a user friendly rod for any angler to use as you can load your weight on the rod by bending your knees during the fight.

※The + symbol next to the power class indicates that the power and tenacity has been added to the usual power class.

Aquila MST 85-7+

This is a model for anglers targeting supersize Kingfish with the use of 40g~120g lures. Although it is categorized as a power model, the lightness of the rod will allow anglers to cast all day long and freely pursue the lightning speed Kingfish. As the bending point transfers towards the angler once hooked up, anglers will be able to conduct a steady fight by countering your body weight against the fish by lowering your hips and loading the rod even when you're almost against the bow railing. Furthermore, the length of the rod will also assist you when conducting long casts towards feeding tuna.

Aquila MST 711-8+

This model is especially designed for anglers who face the dorado pattern, requiring them to utilize large lures up to 180g for the supersize Kingfish. It is also ideal for those anglers who like to go head to head with powerful fish in shallow areas. The underlying power of the rod also allows you to utilize this rod for the GT game. Compared to the ordinary GT rods, this rod will bend over more naturally, which is ideal for smaller/shorter and even female anglers.

Aquila MST 82-9+

In the ever evolving Kingfish game, the need to use large lures has increased with the target feeding on large size bait-fish. The MST82-9+ was designed to enable anglers to fully-cast lures exceeding 240mm while easily controlling and maneuvering these mammoth lures. Furthermore, the Aquila MST series are especially designed to tenaciously bend in while demonstrating outstanding lifting power when fighting against monstrous Kings in rough terrain and gushing currents. Although we have designed the rod with easy utility, it is the strongest of the series and one will require ample body strength and experience to maximize its true potential. Having said that, we are confident that this rod will help anglers in the toughest of conditions, against the biggest of fish while using these large lures. We present this rod for those who are seeking monster class Kings around the world.

Aquila MLT / MULTIPURPOSE

The Aquila MLT series were developed for situations where your targets are feeding on super small baitfish (white bait) and require anglers to utilize lighter tackle or for situations where the fish are highly sensitive towards fishing vessels and require anglers to cast long distances. You can say that we had to fuse together contradicting features of casting and controlling light lures while possessing the power for large species and maintaining the initiative of massive fish during the fight. It is a new generation of rods designed to catch large species with light tackle, requiring anglers to maximize the strength of the line. This line-up of rods compliments the compilation of models produced for our off-shore series.

※The 2/4 notation on the rod means the tip section is a PE2 class while the butt section is PE4 max. (3/6 means the tip is a PE3 class while the butt is a PE6 class)

Aquila MLT 82-2/4

The MLT82-2/4 has a tip section of a PE2 class, enabling anglers to accurately cast and control small ~ super small lures. It is an ideal model to overcome the challenging game where the white-bait are on the targets main menu. With its outstanding casting ability and controllability of the small lures, anglers will be able to reach great distances when casting and won't spook the fish from the presence of the boat. Although the tip section is light, the PE4 class butt section will enable anglers to maintain the initiative during the fight and lift the fish efficiently. Its versatility will allow anglers to target and land various species from the blue-runners, bonitos, dorados, and tuna. We hope this rod will assist those anglers who have been itching to cast smaller lures, farther, wider and with lighter line to catch your dream fish.

Aquila MLT 82-3/6

This is a model with increased power to PE6 class compared to the MLT82-2/4, but for use with small lures and light line. The tip section has the flexibility of a PE3 while the butt section possessing the power of a PE6. When comparing to the ordinary PE6 class rod, anglers will be able to swing through with less effort while increasing the accuracy and casting distance. The blank will bend over nicely once loaded yet possessing the underlying power to stop the monstrous fish. During the testing of this model, we were able to catch a 47kg yellowfin tuna in less than 10 minutes with a PE4 line. With the contradicting features of power (for lifting the fish) and flexibility (for casting and controlling smaller lures), you could say that this rod is at the pinnacle of Ripple Fishers' rod making technology.

B=Length from reel foot to end of grip when reel is equipped

About Comfort Weight

In the Aquila series, the Lure specs are listed as comfort weight. This is because the weight that can be cast will vary depending on the volume and specific gravity of the lure, how you cast it, and the line you use. Therefore, Aquila indicates the weight range that can be cast without stress. Since this is not the maximum value, slight fluctuations in the lower and upper limits are not a problem.

Aquila MLT UnderCast Handle

SHORT HANDLE/OPTION PARTS

For the Aquila MLT series, we have prepared a specially designed short handle for those anglers who need to utilize under-arm casting when boarding large charter boats. The total length of the rod is approximately 7ft 10inches with the short handle. The short handle is sold separately and does not come with the rod.

Aquila ST / STANDARD

The Aquila ST series are models which have had all the standard yet important factors for the casting game fused together at a high dimension. Specifically, the standard performances of casting, lure maneuverability, hooking up the fish and fighting. They have a sharp feeling and once the rods are loaded with the fish, the bending curve will gradually transfer towards the angler, allowing for a steady fight utilizing the butt power to maintain the initiative of the fight. We have prepared 4 power classes of PE #2, #3, #4 and #6 to cater for various species and situations.

Aquila ST 81-2

The model was designed to capture the selective species such as Spanish mackerel and bonitos around the bay. Focusing on the castability and operability of small lures, we dedicate this rod for those anglers who continuously cast until they hookup a fish. Once you are onto a fish, the reliable butt section will allow for a speedy fight and will help you catch great numbers especially when the feeding time is limited. It is a sharp blank typically seen in the ST series, and the belly section with ample stiffness helps easily control and maneuver the lure. This will allow anglers to utilize jerking action with minnows to induce bites from the spooked predators.

Aquila ST 78-3

The shorter rod length is designed for easy handling and casting for use on small ~ medium size boats. The tip section has sufficient stiffness, yet allows anglers to cast smaller size top water plugs to maneuver on the surface. It is an ideal rod for targeting bonitos, yellowtails and Kingfish, which require subtle lure control with light line. For those who own boats, you can target various species with this single versatile short length rod.

Aquila ST 80-4

This medium powered rod is your PE4 class casting rod for your local waters. Once loaded, the rod bends smoothly towards the butt section, creating a beautiful arc. Although it has a sharp feeling, the slow tapered rod is designed to bend towards the butt section to absorb the thrashing run and enable a stable fight against 10kg class Kingfish.

Aquila ST 85-6

This ST85-6 have enough sharpness on blanks to deliver small lure like a bullet. Especially when you have to cast into boil of kingfish or tuna in head wind, you won't lose accuracy and you can deliver lure where you have wished to. It has been designed to be worked as like your arms on manipulating and provide you a stability on fighting.

Aquila EX / EXPEDITION

The Aquila EX series are the ultimate 3-piece expedition pack rod without compromises. Today, anglers are flying around the world to target their dream species and the farther you go, the more limitations there are regarding your luggage. Through countless trial and error, the Aquila EX series have now come to shape and ready to travel with you wherever you go. We have prepared a PE3 and PE6 class models for use with a vast range of lures with a super sharp feel to it. Although they are 3 piece models, it possesses a sharp feel to it and anglers will be able to bend and load the butt section of the rod to stop the monstrous targets. We are confident that these models will help you catch those rare species at the most remote areas around the world.

Aquila EX 79-3

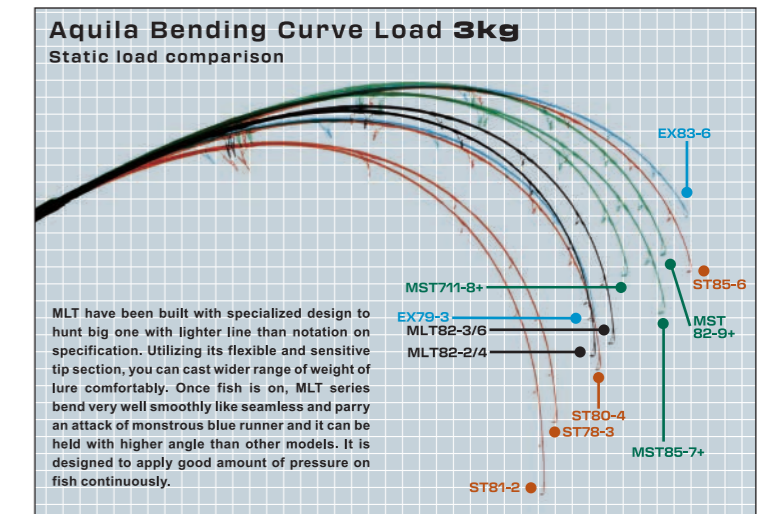

The EX79-3 was designed with its sights on targets like the Cubera snapper, Roosterfish from Latin America and other exotic species that inhabit the various Amazon ponds in Asia. As you are limited with your tackle options when traveling the world, we have created this versatile rod for use with a vast range of lures from the large jig heads, poppers and diving pencils. The rod can be characterized as being a little stiffer compared to the ordinary grip joint rods, but it is a highly responsive rod also ideal for use in the casting game targeting the bonitos and yellowtails from smaller boats.

Aquila EX 83-6

The EX83-6 is a model ideal as a light tackle rod for the GT game or Kingfish game. Through the countless testing phases, we were able to come up with a "flexible" tip section which is extremely rare for pack-rods, enabling anglers to easily control the subtle action of middle size diving pencils. During the field-testing, the butt section was able to stop the run of the GT in shallow waters of 6m, while the rest of the rod bending and absorbing the power of the angry GT. The rod has proven itself that it can be one of your trusted main weapons for your exotic expeditions around the world.

Ultimo

Ultimo / Boat Casting
Giant trevally / Kingfish

The Ultimo series are the lightest in weight, highly well balanced, possess a light casting feel and armed with outstanding butt power to win over the massive fish.

We focused on its casting ability as the most important aspect which is obviously the key factor when venturing out for a casting game. The choice of carbon material and guide settings were vital and the light yet highly resilient blank possess the power suited for the needs of the recent evolution in the off-shore fishing scene.

These four models are the flagship in Ripple Fisher's boat casting rod series.

Our mission was to create rods which are lighter, cast farther, are stronger and most efficient when going head-to-head with monstrous species.

Ultimo 82ML Spinning Model

This model is ideal for top water GT and Kingfish game for anglers to utilize diving pencils, as it is equipped with a sensitive flexible tip to reduce handling error of the lure and stiff blank characteristics seen in ML class rods. The blanks followability is extremely high as it will easily bend in as soon as the raging large fish starts running and it is designed to bring out its true strength of the butt with little strain on the angler. The lifting ability of the butt section of the rod will outperform its line-class specifications in highly rugged dangerous areas. Thanks to the medium light class blank design, the light casting feel and highly well balanced rod will assist anglers in the highly strenuous big casting game.

Ultimo 83M Spinning Model

This will be your standard model with a total balance of casting feel, controllability and fighting performance factors required to target GT and Kingfish. Anglers will easily be able to sharply cast out diving pencils and poppers around 240mm while lightly and effectively maneuvering the lure through the manually handling blank. Once the rod is loaded with the weight of the fish, it will bend in nicely and allow anglers to put their weight behind the rod to efficiently lift the fish with the responsive strength of the blank. It is ideal for not only GT but also great for aggressively fighting the large kingfish in shallow areas.

Ultimo 710MH Spinning Model

The sharp and stiff blank will allow anglers to easily handle large diving pencils, jerk up sinking pencils from the depths and efficiently and lightly produce splashes with medium mouthed poppers around 260mm in difficult conditions where the use of a variety of lures is required. The short length light feeling 7.10ft rod is well suited for casting from the stern of large fishing charter boats where there is little space to swing your rod around. The torque of the outstanding butt power will smoothly intensify with the weight transition of the angler enabling you to stop the massive fish and take initiative of the fight. It is a new generation power rod with contradicting characteristics of lightness and medium heavy power class which can easily be utilized by anglers with a smaller build.

Ultimo 86M/B Overhead reel Model

The highly resilient blank was especially designed to cast farther, control and maneuver the rod and easily fight your target with ease. We were also very particular about the length of the rear grip for smoother casting and the front-grip is assembled with a rubber grip to reduce any slippage. This has helped anglers properly grip the front grip during the fight and prevent the reel from tilting downwards. The guides are large in diameter to help release the thick and long leader system with ease. With the many advantages as a bait-casting tackle, anglers will be able to consistently cast with ease and capitalize on the strong winding power of the reel. The model will open up new opportunities for anglers around the world and will not only be ideal for experts but also for beginner fishermen.

ROD DETAIL PICK UP

For spinning models, we have utilized SIC-S titanium frame K+SIC-RV guides for optimal excretion of the line.

By inserting a resinous ring in the grip end rubber cap, it will drastically reduce the grip end being stuck in the gimble belt (fighting belt) during the fight, allowing for a smooth fight to landing of the fish.

OceanVoyager GTXpedition

GTXpedition / GT & Kingfish Boat Casting
Giant Trevally / Kingfish

Ripplefisher's 3 piece pack rod, "GTXpedition" model has been designed to consider the recent traveling limitations, the collapsed length has been set to 887mm for the two PE6 and PE8 class rods. These models are not only suitable for your GT fishing in exotic locations but also trips targeting massive kingfish. By combining these rods with the Aquila EX models, anglers will have a wider range to choose from depending on the sea conditions, lure size and target size.

By reviewing the bending of the new GTXpedition models, we were able to perfect it as a 3 piece rod. With its lightness, outstanding balance, sharpness and appropriate bending curve, you will not believe it to be a multi piece rod. We hope you can first handedly experience the ever improving technology at Ripplefisher.

GTXpedition 81M

This is a PE6 class multi piece model to target GT and Kingfish domestically or internationally. It is ideal for use with diving pencils and small mouthed poppers. The seamless bending curve pleasantly surprise you as it will not feel like a 3 piece blank. Anglers will be able to cast into strong head winds with its added sharpness and the blank will assist anglers to maintain balance during the fight and efficiently lift the fish. We are proud to present you this rod with the potential to go head to head against 30~40kg class GT while being a PE6 class light and sharp rod.

Angler's Weight : 55kg~ (Recommendation)

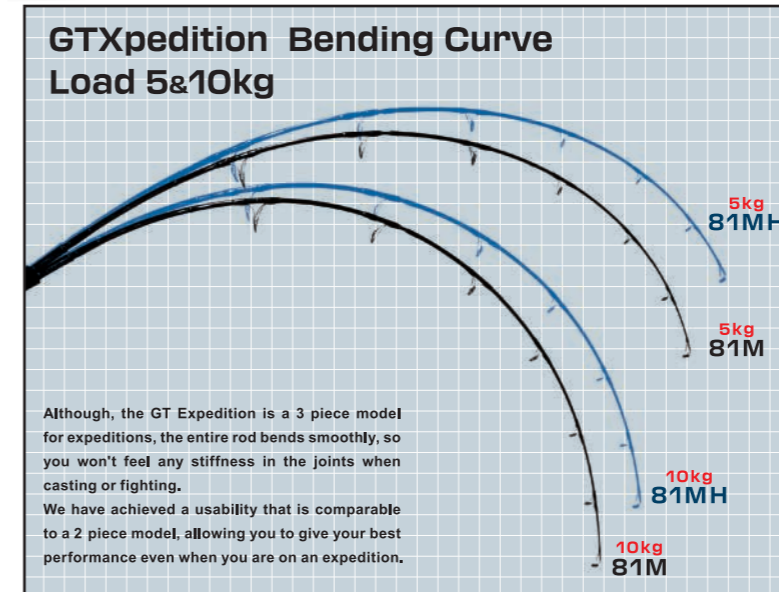

GTXpedition 81MH

This is a PE8 class multi piece model to target large size GT as its main target domestically or internationally. The sharp and highly resilient blank is ideal for use with large diving pencils and medium size mouthed poppers. You will be able to utilize and sharply maneuver these lures with little effort thanks to the characteristics of the blank. The sharpness of the blank will also reduce the load on the angler when casting all day long. In contrast to the 81M, this model is more muscular and has a sharper blank with instantaneous force enabling anglers to take initiative and have a speedy fight with the monstrous fish. You will be able to load the blank and stop the fish in shallow waters or around rough structures. This is the ultimate travel rod we were able to produce through challenging the limits of a multi piece rod.

Angler's Weight : 65kg~ (Recommendation)

The GT Expedition comes with a thick synthetic leather rod bag that provides excellent protection for your rods and allows for compact storage.

OceanRidge

OceanRidge / GT Boat Casting Giant Trevally

The OceanRidge series are GT rods especially designed with Ripple Fishers' brand characteristics. The lineup built up for the needs of the expert anglers require manual maneuvering and will bring out the true skills in anglers. These are not your ordinary lineup and will not suit all anglers. But rest assure that these rods will feel like a part of your body once anglers have established their style and skill.

The GT game is becoming tougher and tougher each year and sometimes require the use of supersize lures to induce a bite. Ocean Ridge series including the strongest GT78 is not simply an over powered rod but will become your biggest asset in specific situations and against monstrous GTs.

OceanRidge Reversal GT 80 Nano

This is a model where anglers will be able to experience and feel for the distinct difference in the Nano blank. It is lighter, stronger and more sensitive while having an astounding ability to cast long distances. Anglers will be able to utilize pencil type lures and small/medium mouthed poppers to land those massive GT. The blank has a smooth bend curve with increasing torque as more load is applied on the rod. It is an ideal rod for those who have never experienced our OceanRidge series or those lighter weighing anglers (approx.60kg) who have the skill to smoothly transfer their body weight on the rod during the fight.

Angler's Weight : 65kg~ (Recommendation)

OceanRidge LC GT 82 Nano

For those who want to cast farther than any other angler on the boat. This is an ideal rod for use when long casting is required or casting against head winds. It is suited for use with poppers and diving pencil type lures. The Nano material has not only increased its controllability but anglers will also be able to sense the slightest changes in current movement through the blank, line and lure while efficiently and effectively surface the GT. Although it is a long casting model, you will be pleasantly surprised with its lightness and controllability.

Angler's Weight : 70kg~ (Recommendation)

OceanRidge PF GT 711 Nano

Although this stiff and super sensitive rod may be limited for use by experts, its true potential will be exhibited once anglers with vast knowledge and skills take hold of it. The NANOALLOY® technology developed by Toray has sharpened the blanks capabilities allowing anglers to decipher the subtle changes in current and control the lure at the anglers will. The PowerFight 711 has remarkable lifting power and will surface GT exceeding 50kg simply by loading up the rod and using its repulsive force.

Angler's Weight : 70kg~ (Recommendation)

OceanRidge FINAL SPIRIT GT 78

his is the most powerful and toughest GT rod Ripple Fisher has ever developed with stiff characteristics in the tip to belly section for easy use with large mouthed poppers and outstanding lifting power in the butt. The blank is highly responsive and once hardcore anglers put his/her full weight behind it, the repulsive force in the blank will efficiently lift the fish. It is an ideal rod for short popping of large mouthed poppers and controlling massive 300mm class pencil type lures when the GTs are feeding on super large baits. It is not a rod that you want to be using all day long, but a rod that you want to bring out in hairy situations with gushing currents and rugged terrain.

Angler's Weight : 80kg~ (Recommendation)

OceanRidge PF GT 711 Nano

MORE ABOUT SHORE CASTING MODELS

<Explanation of Ripple Fisher's Shore Casting Rods>

Ripple Fisher's shore casting category is a lineup that can handle a wide range of species, ranging from light games such as horse mackerel and rockfish to extreme fishing for GT off the rocks. The series are developed according to the nature of your target species to overcome the various situations anglers may face. We hope this will be of reference for you to choose your rod with the following explanations and diagrams.

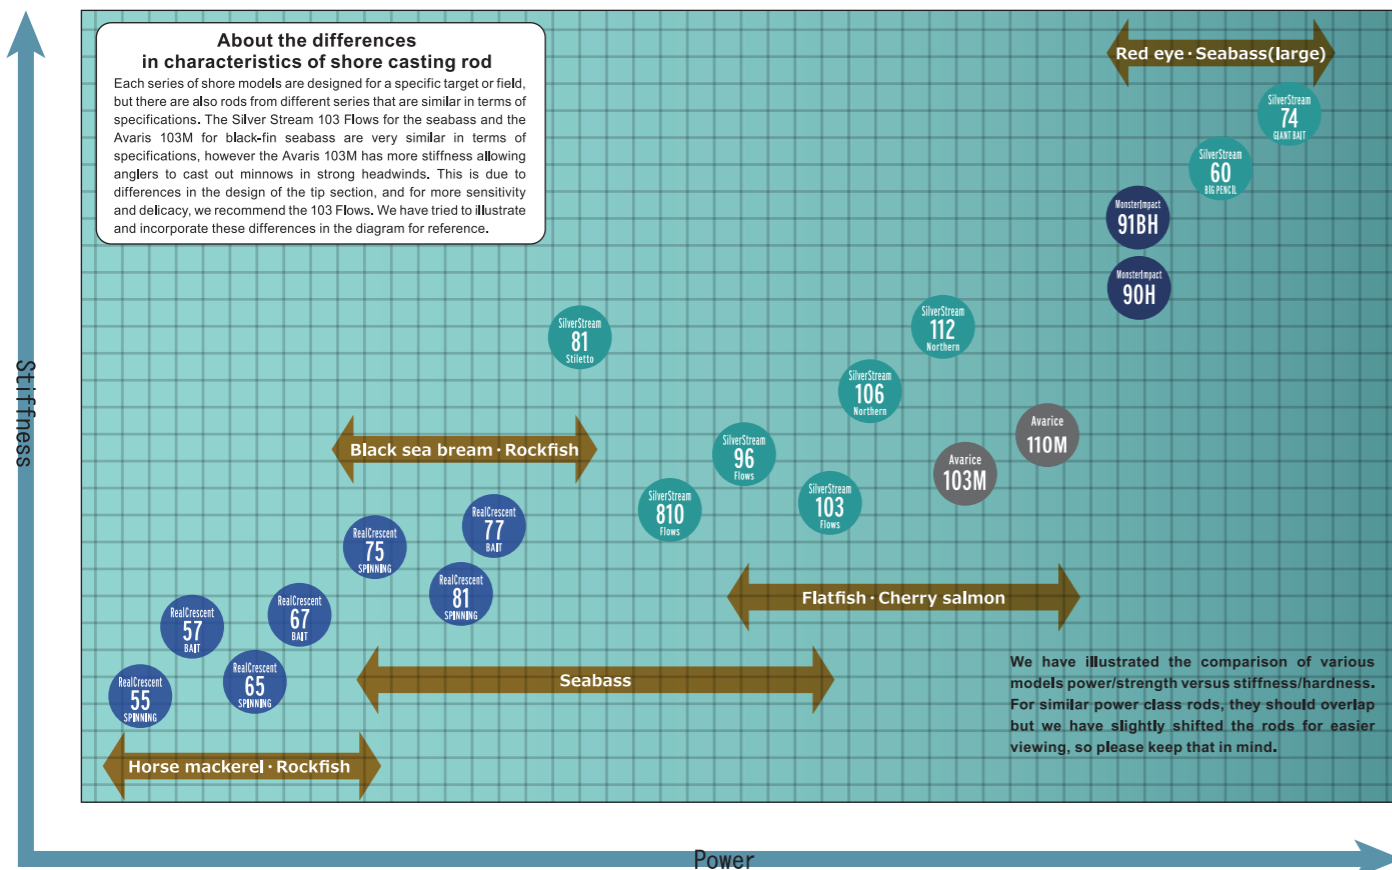

Shore casting model field type explanation

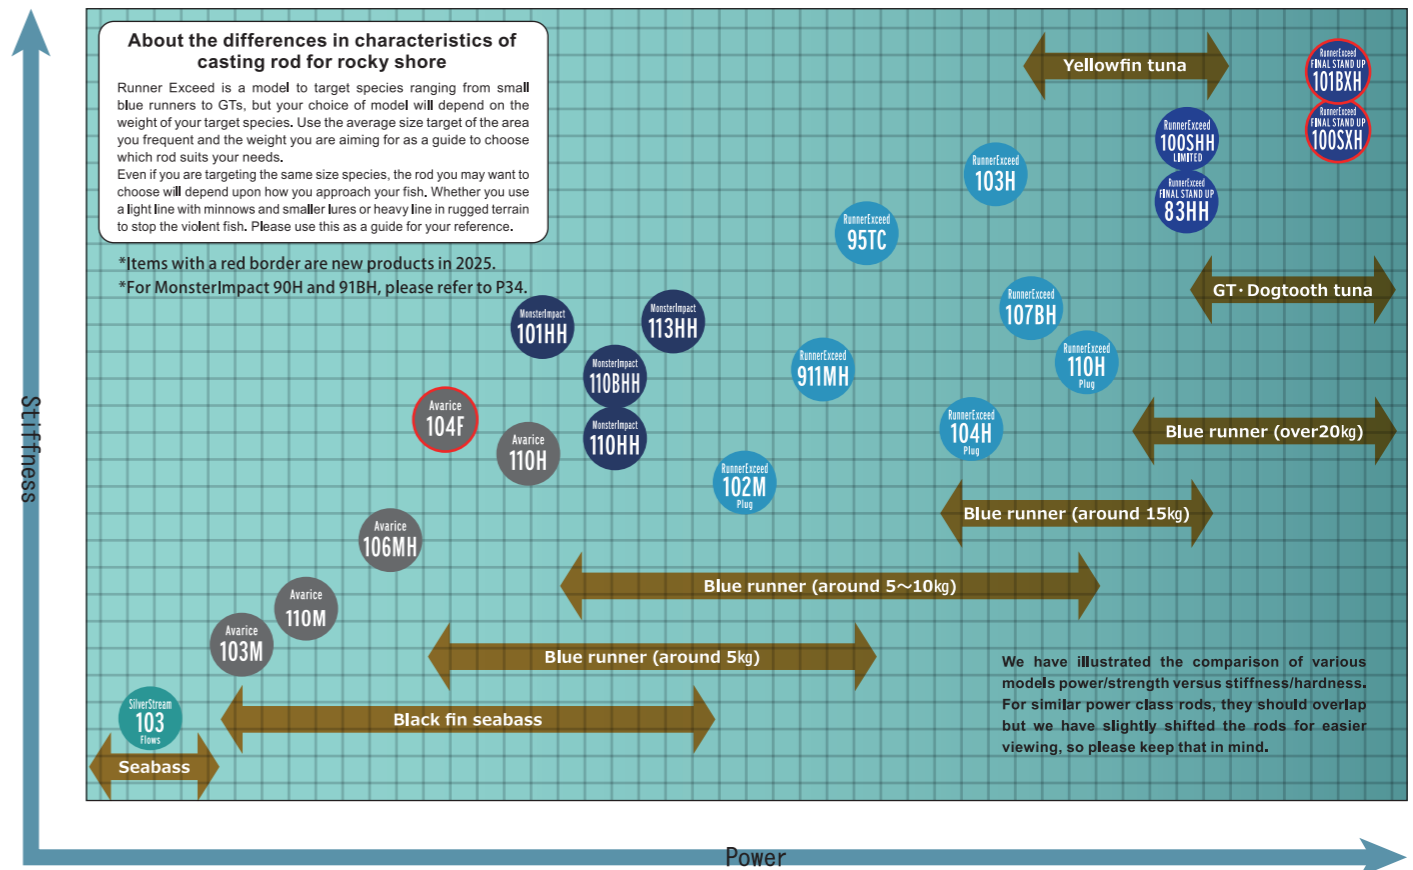

RealCrescent	Breakwater	Breakwater·Rocky Shore
Suitability of Field	RC-55/RC-65/RC-57B/RC-67B The RC-55, RC-65, RC-57B, and RC-67B are highly sensitive models that can be used with jig heads of around 1g, but they also have the power and tenacity to easily bring in large horse mackerel and large rockfish. They are also suitable for a wide range of light games, such as those using very small lures for trevally and small seabass.	RC-75/RC-81/RC-77B The RC-75, RC-81, and RC-77B are versatile rods able to handle a wide range of lures. Anglers can utilize anything from 2g jigs, micro lures, top water lures and minnows up to 9cm. They are great for targeting bream, seabass, small rock fish and other species in the shallow reef.
	High Sensitivity 81 Stiletto The 81 Stiletto is a model made entirely of 40t carbon, and is a rod with ultra high sensitivity and high action performance. Anglers will easily be able to control 7g sinking pencils at any given field, whether it be the river, break water, pier or off the rocks.	All-Purpose Flows 810/96/103 The Flows series 810, 96 and 103 are equipped with highly sensitive tips and are designed for anglers to capture the current of river. The butt section has MH power allowing anglers to target meter class seabass.
SilverStream	Distance Casting Northern 106/112 The Northern series 106 and 112 are models that have been tuned to maximize the long casting distance of jigs and jig minnows. They are also great for surf fishing, taking advantage of their long casting ability.	Big Bait Lures 60BP/74GB The 60 Big Pencil provides excellent maneuverability for large top water plugs, while the 74 Giant Bait excels at maneuvering jointed plugs over 300mm, and is effective not only for seabass but also for large akame (Japanese barramundi) that feed on large baits.
	Characteristics of Each Model	Characteristics of Each Model

Avarice	Rocky Shore(Flat)	Specialized Model	Rocky Shore(Rough)
Suitability of Field & Characteristics of Each Model	103M/110M By increasing the followability/flexibility of the blank of the 103M and 110M, we have minimized the stretching of hooks when using smaller lures. Anglers are able to utilize these smaller lures for high pressure fields with little water movement.	104F This is a super fast taper blank equipped with outstanding castability for high accuracy. The highly sensitive blank allows anglers to keep the target away from reef edges and rocky heads at your will thanks to the fast tapered characteristics. It is a specialized model for black fin seabass with its ability to cut through strong head winds with the short and sharp blank.	106MH/110H The 106MH and 110H have a high lifting power that can surface tunker size black-fin seabass in gale force winds and heavy seas. The sharp blank is ideal for use in strong winds over 10m/s and high seas.
	MonsterImpact	Large Plug 90H/91BH This model is designed for anglers targeting species feeding on large baitfish. It is easily capable of casting out lures around 200mm to target meter over seabass and 20kg class barramundi.	All-Purpose 110HH/110BHH This model can handle anything from 15g minnows to 60g diving pencils to cater for a variety of fishing patterns. Anglers will be able to target black-fin seabass and blue-runners from the break-water, rocky headlands and rocky surf beaches.
RunnerExceed		Multi-Piece 113HH The 113HH is a highly portable 4 piece model with storage dimensions of just 90cm. It allows anglers to safely venture into their secret fishing spots with long walks or high elevation. They are equipped with double footed guides for extra strength.	Main Model For Plugs and Jigs 911MH/95TC/103H The three all-purpose models can be used for a variety of techniques with a diving pencils, popper, or jig. They have a strong overall stiffness and manual controllability of their lures to easily maneuver their lures for the bite. These models are especially compatible with jigs, and are recommended for anglers who use jigs frequently.
	Characteristics of Each Model	Emphasis on Stability 100SHH/83HH The targets are kingfish over 20kg, GT and dogtooth tuna, which can be targeted in your exotic locations around the world. <ul style="list-style-type: none"> The 100SHH has a light and easy feeling when in use unlike an HH class rod. It is not only capable of handling large lures but also smaller 60g lures when your supersize kingfish are feeding on smaller baits. The 83HH is a model that can handle large plugs and large-mouthed poppers over 150g with ease throughout the day. The short length blank makes it easy for anglers to bend and load the rod. Ideal for mammoth amberjacks and GT off the rocks. 	Emphasis on Lifting Power 100SXH/101BXH As the name suggests, these two models are specialized for their lifting power and are by far the strongest of any of our land-based casting rod. <ul style="list-style-type: none"> The 100SXH is stiff throughout the whole blank and will allow anglers to easily cast out large lures. The 101BXH also has ample stiffness throughout the rod but is a little easier to ally pressure on the butt section to utilize the powerful winding with the bait-caster reel. It is also compatible with the long leader and sea-hunter line systems.

STRENGTH TO ACHIEVE

for challengers aiming beyond

The RunnerExceed series are land-based casting rods packed with characteristics required to go head to head with monstrous bluerunners off the rocks. Targets including your local yellowtails, kingfish, amberjacks to those GT, and dogtooth tuna inhabiting the warmer waters. Our lineup of rods are designed with the capabilities to "catch" your dream fish in the harshest environments.

Each and every angler will have their own style but there is one thing in common and that is the "strength" the RunnerExceed series have.

We would like anglers who challenge themselves to the limits to first handedly experience the lightness, controllability, resilience and strength of the series when most needed during the fight.

"Main models" target Blue runners such as Kingfish and amberjack yellowtail, and we even have models with a view to over 20 kg in Kingfish.

In addition, we also have renewed "Extreme models" for more rugged areas to target non standard Big fish such as GT and Dogtooth tuna, opening the door for more rock shore games.

We dedicate this model to those anglers who are challenging themselves to the limit, as the lightness, controllability, resilience and overwhelming power in the rod have been designed to do exactly that.

RunnerExceed EXTREME MODEL

The Runner Exceed Extreme Models are series dedicated to anglers who continue to push themselves to the limit. Land based big game is a tough and at times very dangerous style of fishing but the joy of landing your trophy fish is so special. In recent years, anglers have established their local areas and thanks to the easy access to information these days, this style of fishing has become a lot more familiar to various anglers around the world. However, in the face of overwhelmingly powerful nature and unknown monstrous species, there are many moments when human knowledge and efforts are beyond reach. No matter how experienced and well-prepared you may be, anglers will be defeated and go through many setbacks. These difficulties, toughness and challenges are the reason we keep going. It is worth pursuing.

The excitement that comes at the end of that challenge.

Each catch comes with a special moment and is the reason why anglers make it a lifelong goal.

It's all about the moment. We, Ripple Fisher, will continue to challenge the limits of product development together as long as there are anglers who continue to challenge their limits.

In 2025, the two core models of FINAL STAND UP will be reborn. The 100SXH and 101BXH, which have been perfected through numerous field tests, have the most power in the Runner Exceed series while refining their light usability. The 83HH takes advantage of the short length to enhance the power fight and the usability of the large plug, making it effective in specific situations. The 100SHH LIMITED is a highly versatile model among the EXTREME MODELS, with the blank designed with a special carbon configuration. The rod is highly resilient and has an exceptionally light user feel. These four models in the lineup are Ripple Fisher's EXTREME MODELS, which were created for anglers who like to challenge their limits. They will show their true potential at the most extreme conditions against unimaginable monsters in the field.

2025 NEW

RunnerExceed FINAL STAND UP 100SXH

Boasting the strongest power in the series, the 100SXH is a high powered rod that is designed for anglers to go head to head with the large species. It takes a certain amount of physical strength and skill to be able to swing it around, but if you can, it is a lethal weapon. The highly resilient blank will allow anglers to cast out large lures with ease, while lightly controlling the lures and guiding the large species. Once you get the hang of this rod and it becomes part of you, there is no looking back. It is a rod that makes anglers grow.

RunnerExceed 100SHH LIMITED

Our goal was to create a rod that possess the power of an XH class rod while having the lightness of a H class blue runner rod. The whole rod is stiff including the tip section, able to sharply cast out lures with the strong repulsive force from the blank. Anglers can not only comfortably cast and control large lures weighing 150g, but can also cast out smaller lures weighing 40g by loading the rod with the weight of the lure. With the strong repulsive force, the rod is also ideal for use with jigs. Anglers will easily be able to aggressively fight fish around 10kg with the outstanding lift power and tenacity. This is a highly resilient carbon rod not only ideal for anglers targeting monstrous size blue-runners but also great as an entry level land based GT rod.

2025 NEW

RunnerExceed FINAL STAND UP 101BXH

Not only does it offer the advantage of the use of various line systems, but it also has a sharp cast feel and torqueful butt power. With its excellent balance, the overwhelmingly powerful rod feels light allowing anglers to comfortably swing it around all day long. We've packed all the elements needed for the land-based big game fishing with all the benefits of the bait-casting tackle. This is RippleFisher's current answer for land-based big game fishing with bait-tackle set up.

RunnerExceed FINAL STAND UP 83HH

The 8.3ft short length blank with tenacious strength in the belly to butt section will effectively apply pressure on the fish once loaded. By shortening the overall length of the rod, it has allowed anglers to consistently apply pressure on the fish during the fight while being able to fully cast out large size lures with the least amount of effort. Furthermore, the short length will reduce the strain on the angler when utilizing large mouthed poppers, conserving the energy of the angler until the fight begins. We are confident that the 83HH will bring about great advantages to the anglers when unexpected monstrous fish attack your lure with its light controllability and highly responsive blank which will continuously and effectively apply pressure upon the fish.

ROD DETAIL

Please refer to the list on [page 62](#) to check details of rod specifications.

Reel Seat : Spinning Model **DPS22**
Bait Model **T-DPS22** (Fuji)

A=Whole length of grip
B=Length from reel foot to end of grip when reel is equipped

The 83HH has a blank design that allows you to stably fight you target under high loads because the bending point is set closer to the angler.
The 100SHH is characterized by a highly resilient blank that is not very well depicted from this diagram but it is comparable to an XH class power rod.

The "FINAL STAND UP 83HH" is loaded with an RV guide for the butt guide for smooth excretion of line to improve casting distances even with its short length.

The spinning model of the FINAL STAND UP uses a rubber material for the fore grip and shaped with grooves to improve the grip. This allows anglers to take a solid grip of the rod reducing any slippage during high-load fights.

The grip of the bait model "FINAL STAND UP 101BXH" is not only easy to grip during fighting, but also easy when guiding your line into your bait-caster reel while maneuvering the lure. In addition, a rubber grip is used to prevent slippage during the fight.

RunnerExceed FINAL STAND UP 100SXH

RunnerExceed FINAL STAND UP 100SXH

RunnerExceed FINAL STAND UP 101BXH

RunnerExceed MAIN MODEL

The Runner Exceed series are a wide range of rods to target the yellowtails in your local waters to the bigger and harder kingfish off the rocks. The 3 plugging models are ideal for use with diving pencils with the flexible yet powerful blank to apply ample pressure on the fish.

The 911MH and 103H are versatile models for use with both jigs and plugs and the 95TC is ideal in tough conditions where delicate maneuvering of the lure is required. We also have a 107BH for those over-head reel enthusiasts. Although your targets may be similar, the 7 choices of rods will open up new doors for different locations, field conditions, and styles of approach toward your rocky shore game fishing.

RunnerExceed 102M Nano / PlugModel

This is the lighter plugging model of the Runner Exceed lineup. With its soft tip section, anglers will be able to utilize lures ranging from 20g minnows, medium size diving pencils, and even jigs weighing up to 90g when the bite range is far and deep. It is ideal for anglers targeting Kingfish and Amberjacks to 5kg and Yellow-tail weighing up to 10kg.

RunnerExceed 104H Nano / PlugModel

104H is While being able to easily control diving pencils through its soft tip, once the rod is loaded with the fish, it will exhibit its true power and potential. Compared to the current 103H, more flexibility is given to the belly section, allowing anglers to lift the rod higher to withstand the final thrust of the fish in close range.

RunnerExceed 110H Nano / PlugModel

The 110H is a next generation plugging model for land-based anglers with a light feel but possessing the power of a HH class rod. With the outstanding rod balance, this rod draws a sharp contrast from those ordinary long length high powered models on the market. The flexible tip section brings about various positive attributes. Although it is classed as a 'H' class rod, the potential of the blank is comparable to the power of those 'HH' class rods, able to go head to head with Kingfish ranging from 10~15kg in shallow waters.

RunnerExceed 911MH Nano

This versatile rod will allow anglers to utilize both jigs and plugs for any given situation and possesses the power to lift 3~4kg fish out of the water with the rod. With its ability to cast a mile with jigs up to 100g, the ideal length to maneuver the jig with the rod under your armpits and absolute balance and flex so the fish doesn't violently thrash about, this rod will surely be your next right arm.

RunnerExceed 95TC

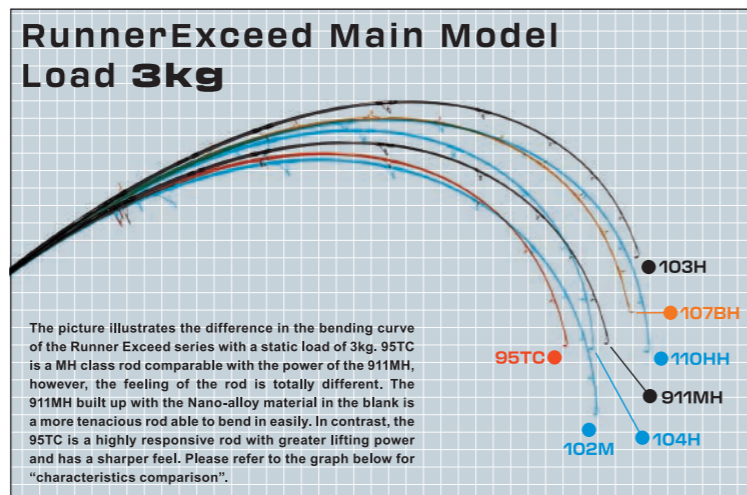

The 95TC is a technical model with a highly responsive blank design to maneuver the lure on a next level. The developmental concept of this model was to enable anglers to utilize various lures including sinking minnow, poppers, diving-pencils and jigs to induce bites in difficult conditions when the sea is flat and the lure is highly visible. The light weight 9.5ft length rod has a MH class strength for fighting 5~10kg blue runners off the rocks. With its outstanding casting distance and highly well balanced characteristics, anglers can utilize this as your main rod or back-up rod for your more exotic expeditions.

RunnerExceed 103H

This is a power up model of the 911MH for use with both jigs and plugs targeting blue-runners around the 10kg mark. Although the cast feeling is sharp, the 103 length of the rod will load up nicely to apply pressure to the fish. For those anglers who prefer the use of plugs, the sharp casting feel will be ideal for you. Anglers will be able to utilize both poppers and pencil type lures with a more manual action.

RunnerExceed 107BH Nano / Overhead reel Model

The blank itself is extremely flexible and tenacious yet possesses a sharp tip to belly section for accurate casting. The butt section is highly repulsive once loaded. Anglers are able to utilize various size lures while capitalizing on the advantages of the long leader system with the use of either nylon or fluorocarbon leaders. Anglers won't be stretched even on the bad footing and will help you target that dream monster class fish off the rocks. Although it is flexible enough to cast light plugs, anglers will be able to stop the violent run from 10kg + kingfish and lift the fish. Once the rod is loaded, the bending curve will slowly transfer towards the angle, allowing the rod to smoothly bend even with the smaller 3kg~6kg fish, yet possessing underling power for those monstrous fish.

Avarice

Avarice / Black-fin-Seabass Game Black-fin-Seabass

The Black fin seabass game is conducted under harsh environmental conditions with strong head winds, heavy swells, complicated currents and uneven footing. Anglers will cut through the strong headwinds and sew through the complicated currents. The highly sensitive blank will allow anglers to notice the subtle changes in current and flow to inform you of bite spots.

With the addition of the new concept model 104F, we will take the Black fin sea bass game to the next stage. It will provide a different usability and strategy than ever before, making the Black fin sea bass game even more exciting.

2025 NEW Avarice 104F

This is a special concept model for anglers to target selective lunker size blackfin seabass with the use of smaller lures with pinpoint accurate casting. The slightly shorter length of 10ft4in allows for easy maneuverability and handling, as well as low trajectory pinpoint casting in strong head winds. The super fast tapered blank is equipped with a sensitive delicate tip to be able to successfully hookup the minute bites from the black fin seabass while the fast tapered characteristics of the rod allowing anglers to safely fight and land fish with its outstanding reach. This is a new concept rod from Ripple Fisher to tackle the ever challenging black fin seabass game.

Avarice 103M Nano

This 103 length is light, easy to handle and is efficient when fishing from low rock formations or bolder rocks for the black-fin seabass or the normal seabass off the rocks and fishing from the surf for flounders. Although it is short in length, the blank will bend nicely to withhold the fish.

Avarice 110M Nano

It possesses highly sensitive characteristics required to transmit the short bite of the blankfin seabass, while the flexible blank bends-in to reduce hook offs due to straightening of fragile hooks. The blank which possess the contradicting characteristics of flexibility and sharpness, allows anglers to sharply cast lures ranging from 10cm to those larger 40g lures. This new standard rod is not only suitable for monster class black fin seabass, but also 5kg class blue runners and snappers off the rocks.

Avarice 106MH Nano

It possesses a stronger butt section compared to the 103M and with its refined taper design, it maintains the easy handling of the rod while improving its castability. You will be able to first handedly experience how the carbon material has evolved from this 10ft 6inch blank packed with castability, loading power and controllability of the fish.

Avarice 110H Nano

This is an almighty rod with its ideal length and power settings for use anywhere, anytime. It is capable of cutting through strong headwinds, while having the ability to cast small lures to pinpoint accuracy and not to mention its overwhelming butt power. The Nano blank characteristics can be noticed in the contradicting nature of its sharpness when casting and its ability to bend nicely once it is loaded.

MonsterImpact

MonsterImpact / Shore Casting for Monster
Black fin Seabass / BlueRunner / Red Eye / Seabass

The Monster Impact series are special models to target various species varying from Blackfin seabass, Akame (Japanese Barramundi), seabass and medium size Blue runners.

With conditions continuously changing when fishing of the rocks, it is absolutely imperative to be able to adapt to the surrounding conditions. The rod was designed from the ground up with the ability to not only go head-to-head with the large species but also have the controllability to technically maneuver and control your lure.

In addition to the highly versatile characteristics of the spinning 110HH and bait-casting model of the 110BHH, their outstanding castability will allow anglers to accurately hit their target when casting, giving anglers great advantages in the most difficult of conditions.

The flexible belly section will enable anglers to easily control top water lures and the powerful butt section will help prevent bust-offs nearing the end of the fight off the rocks, allowing for a smooth landing of the fish.

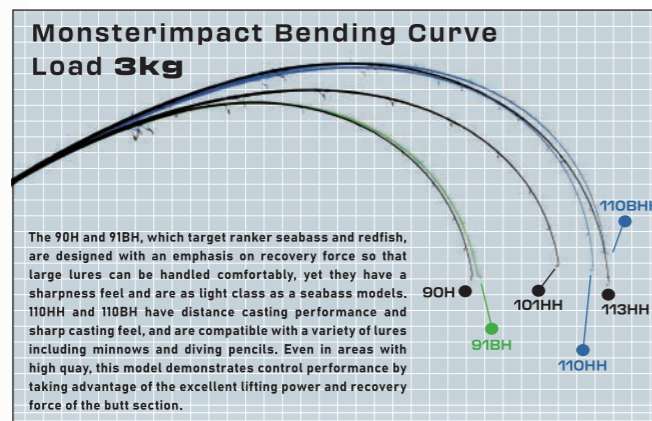

We also have the 101HH to target Blackfin seabass and Blue-runners, the 113HH/4pcs which is highly portable, and the 90H/91BH for monstrous seabass and Akame (Japanese Barramundi). We hope you can experience first handedly RippleFishers new era in the power-rod scene.

MonsterImpact 90H Spinning Model

This is a specially tuned seabass model to easily cast through with big-baits (70g) and even small minnows from 20g. The butt section has been enhanced to easily stop lunker size seabass and Red Eye (Japanese barramundi) that are feeding on large bait fish (Sardines, gizzard shad, and mullets). We aimed to produce a rod where anglers will be able to enjoy casting large plugs a great distance. We present this ultimate spinning rod for the ultimate spinning anglers.

MonsterImpact 91BH Overhead reel Model

The blank of the 91BH has been shaped for accurate casting and controlling of big bait plugs up to 130g. Although it is a power class model, the sensitive blank will transmit the minor existence of 20g class minnows and will allow easy control. It basically has the same concept as the 90H spinning model but has a greater range of lure usage and allows anglers to utilize thicker and longer leader systems advantageous in overhead reel tackle settings. The direct controllability of the lures and consistent casting accuracy will surely help you further enjoy your big bait game.

*Static load comparison does not represent all rod characteristics such as repulsion force. There are individual differences in how the load is applied when actually bending the rod, so please use this as a guide only.

MonsterImpact

MonsterImpact 101HH Nano Spinning Model

101HH is designed to target both the black-fin and blue runners but this 101HH is set more towards the blue runners. In other words, it is for anglers who are targeting blue-runners and might want to also cast out a few small lures for the black-fin. The short length 10ft 1in and its short grip has been set for use around flat rock formations, to increase the casting accuracy and balance. Although it is a rod for the black-fin, it can also be used for situations where the bait fish are extremely small when targeting the blue-runners with smaller lures.

MonsterImpact 110HH Spinning Model

The Monster Impact 110HH is built up with material and engineering technology with a flexible yet sharp blank feel. This has helped enhance the casting and control of lures while the sensitivity will transmit the vital information under the water. With its length and castability, it is an ideal rod for use when fishing off elevated large rocks and a stretch of shallow rocky grounds. It can not only cast small 9cm class minnows but also larger diving pencils for your Blue-runners. The flexible belly section will follow through once loaded and smoothly transfer to the highly resilient butt section to easily surface monstrous Blackfin seabass and medium size Blue-runners. We are confident that anglers will be able to enjoy the high performance and total balance of RippleFishers state of the art technology through the Monster Impact 110HH.

MonsterImpact 110BHH Overhead reel Model

In highly strong headwinds and side winds, this highly responsive and powerful bait casting model will help anglers seek a different approach compared to the spinning model. Its absolute casting technology will allow anglers to cast pinpoint accuracy in the tightest spots and anglers will not miss the split second timing between large sets in the heavy seas. Its fighting response and butt power will enable for a powerful fight against medium size blue runners nearing the rocks. This model will be advantageous in the roughest of conditions and will allow anglers the ability to venture out to locations never set foot in before.

MonsterImpact 113HH / 4pcs Spinning Model

The 113HH is a powerful pack rod which allows easier access to your fishing grounds to target Blackfin seabass and Blue-runners. The short 90cm separate length can be stowed in your backpack and freeing both hands of any rods will help anglers safely reach some of the more remote and dangerous land based fishing grounds. It is a versatile rod able to handle small minnows to medium size diving pencils with a seamless bending curve rarely seen in any 4 piece rod. The rod possesses contradicting qualities of both powers in the butt section to stop the run of monstrous fish and flexibility in the belly section to avoid any hook offs. While being highly resilient this regular tapered blank will show its true potential in the most critical time. The MonsterImpact 113HH/4pcs rod comes with its own special rod bag and a useful neoprene rod bag for your fishing trips. The rod also fits nicely onto the RippleFisher waterproof backpack.
