

VARIOUS BOAT CASTING TACTICS

Aquila

Aquila Boat Casting

Spanish mackerel / Bonito / Kingfish / Yellowtail / Yellowfin Tuna

In our lineup of Aquila are 11 models. We have categorized them into four different series, ST, MLT, MST and EX. The ST series are the most standard models, which are well balanced and fine honed to cater for various situations and various targets. The MLT series have a combination of a flexible tip section and a stiff butt section to go after massive fish with light line. The MST series are the already popular models to go after monstrous Kingfish with sheer power and strength. The EX series are 3 piece pack rods for anglers traveling around the world. The Aquila series are rods built to defy the boundaries of fishing. It was our quest to seek lifting power, easy handling of lures, outstanding castability and last but not least, the ability to parry the angry fish. We don’ t simply make rods with “power” , we make rods with “strength” .

Aquila MST / MONSTER

The Aquila MST series have been designed for those anglers with their sights on monstrous Kingies. The main purpose of these rods are to enable anglers to go head to head with supersize fish with the use of strong PE7~8 class line and large lures for situations when the targets are feeding on large bait fish like, dorados, needle fish, flying fish etc. These rods are not just a stiff stick with power. On the contrary, in order to deal with sudden dives of the Kingfish, they have been designed with the bending point to transfer towards the angler as more load is applied to the blank. It is a user-friendly rod for any angler to use as you can load your weight on the rod by bending your knees during the fight.

※The + symbol next to the power class indicates that the power and tenacity has been added to the usual power class.

Aquila MST 85-7+

This is a model for anglers targeting supersize Kingfish with the use of 40g~ 120g lures. Although it is categorized as a power model, the lightness of the rod will allow anglers to cast all day long and freely pursue the lightning speed Kingfish. As the bending point transfers towards the angler once hooked up, anglers will be able to conduct a steady fight by countering your body weight against the fish by lowering your hips and loading the rod even when you’ re almost against the bow railing. Furthermore, the length of the rod will also assist you when conducting long casts towards feeding tuna.

Aquila MST 711-8+

This model is especially designed for anglers who face the dorado pattern, requiring them to utilize large lures up to 180g for the supersize Kingfish. It is also ideal for those anglers who like to go head to head with powerful fish in shallow areas. The underlying power of the rod also allows you to utilize this rod for the GT game. Compared to the ordinary GT rods, this rod will bend over more naturally, which is ideal for smaller/shorter and even female anglers.

Aquila MST 82-9+

In the ever evolving Kingfish game, the need to use large lures has increased with the target feeding on large size bait-fish. The MST82-9+ was designed to enable anglers to fully-cast lures exceeding 240mm while easily controlling and maneuvering these mammoth lures. Furthermore, the Aquila MST series are especially designed to tenaciously bend-in while demonstrating outstanding lifting power when fighting against monstrous Kings in rough terrain and gushing currents. Although we have designed the rod with easy utility, it is the strongest of the series and one will require ample body strength and experience to maximize its true potential. Having said that, we are confident that this rod will help anglers in the toughest of conditions, against the biggest of fish while using these large lures. We present this rod for those who are seeking monster-class Kings around the world.

Aquila MLT / MULTIPURPOSE

The Aquila MLT series were developed for situations where your targets are feeding on super small baitfish (white bait) and require anglers to utilize lighter tackle or for situations where the fish are highly sensitive towards fishing vessels and require anglers to cast long distances. You can say that we had to fuse together contradicting features of casting and controlling light lures while possessing the power for large species and maintaining the initiative of massive fish during the fight. It is a new generation of rods designed to catch large species with light tackle, requiring anglers to maximize the strength of the line. This line-up of rods compliments the compilation of models produced for our off-shore series.

※The 2/4 notation on the rod means the tip section is a PE2 class while the butt section is PE4 max. (3/6 means the tip is a PE3 class while the butt is a PE6 class)

Aquila MLT 82-2/4

The MLT82-2/4 has a tip section of a PE2 class, enabling anglers to accurately cast and control small ~ super small lures. It is an ideal model to overcome the challenging game where the white-bait are on the targets main menu. With its outstanding casting ability and controllability of the small lures, anglers will be able to reach great distances when casting and won’ t spook the fish from the presence of the boat. Although the tip section is light, the PE4 class butt section will enable anglers to maintain the initiative during the fight and lift the fish efficiently. Its versatility will allow anglers to target and land various species from the blue-runners, bonitos, dorados, and tuna. We hope this rod will assist those anglers who have been itching to cast smaller lures, farther, wider and with lighter line to catch your dream fish.

Aquila MLT 82-3/6

This is a model with increased power to PE6 class compared to the MLT82-2/4, but for use with small lures and light line. The tip section has the flexibility of a PE3 while the butt section possessing the power of a PE6. When comparing to the ordinary PE6 class rod, anglers will be able to swing through with less effort while increasing the accuracy and casting distance. The blank will bend over nicely once loaded yet possessing the underlying power to stop the monstrous fish. During the testing of this model, we were able to catch a 47kg yellowfin tuna in less than 10 minutes with a PE4 line. With the contradicting features of power (for lifting the fish) and flexibility (for casting and controlling smaller lures), you could say that this rod is at the pinnacle of Ripple Fishers’ rod making technology.

ROD DETAIL Please refer to the list on [page 66](#) to check details of rod specifications.

Reel Seat : **DPS20** (Fuji)

*A=Whole length of grip
B=Length from reel foot to end of grip when reel is equipped

About Comfort Weight

In the Aquila series, the lure specs are listed as comfort weight. This is because the weight that can be cast will vary depending on the volume and specific gravity of the lure, how you cast it, and the line you use. Therefore, Aquila indicates the weight range that can be cast without stress. Since this is not the maximum value, slight fluctuations in the lower and upper limits are not a problem.

Aquila MLT UnderCast Handle

SHORT HANDLE/OPTION PARTS

For the Aquila MLT series, we have prepared a specially designed short handle for those anglers who need to utilize under-arm casting when boarding large charter boats. The total length of the rod is approximately 7ft 10inches with the short handle. The short handle is sold separately and does not come with the rod.

Aquila ST / STANDARD

The Aquila ST series are models which have had all the standard yet important factors for the casting game fused together at a high dimension. Specifically, the standard performances of casting, lure maneuverability, hooking up the fish and fighting. They have a sharp feeling and once the rods are loaded with the fish, the bending curve will gradually transfer towards the angler, allowing for a steady fight utilizing the butt power to maintain the initiative of the fight. We have prepared 4 power classes of PE #2, #3, #4 and #6 to cater for various species and situations.

Aquila ST 81-2

The model was designed to capture the selective species such as Spanish mackerel and bonitos around the bay. Focusing on the castability and operability of small lures, we dedicate this rod for those anglers who continuously cast until they hookup a fish. Once you are onto a fish, the reliable butt section will allow for a speedy fight and will help you catch great numbers especially when the feeding time is limited. It is a sharp blank typically seen in the ST series, and the belly section with ample stiffness helps easily control and maneuver the lure. This will allow anglers to utilize jerking action with minnows to induce bites from the spooked predators.

Aquila ST 78-3

The shorter rod length is designed for easy handling and casting for use on small ~ medium size boats. The tip section has sufficient stiffness, yet allows anglers to cast smaller size top water plugs to maneuver on the surface. It is an ideal rod for targeting bonitos, yellowtails and Kingfish, which require subtle lure control with light line. For those who own boats, you can target various species with this single versatile short length rod.

Aquila ST 80-4

This medium powered rod is your PE4 class casting rod for your local waters. Once loaded, the rod bends smoothly towards the butt section, creating a beautiful arc. Although it has a sharp feeling, the slow-tapered rod is designed to bend towards the butt section to absorb the thrashing run and enable a stable fight against 10kg class Kingfish.

Aquila ST 85-6

This ST85-6 have enough sharpness on blanks to deliver small lure like a bullet. Especially when you have to cast into boil of kingfish or tuna in head wind, you won't lose accuracy and you can deliver lure where you have wished to. It has been designed to be worked as like your arms on manipulating and provide you a stability on fighting.

Aquila EX / EXPEDITION

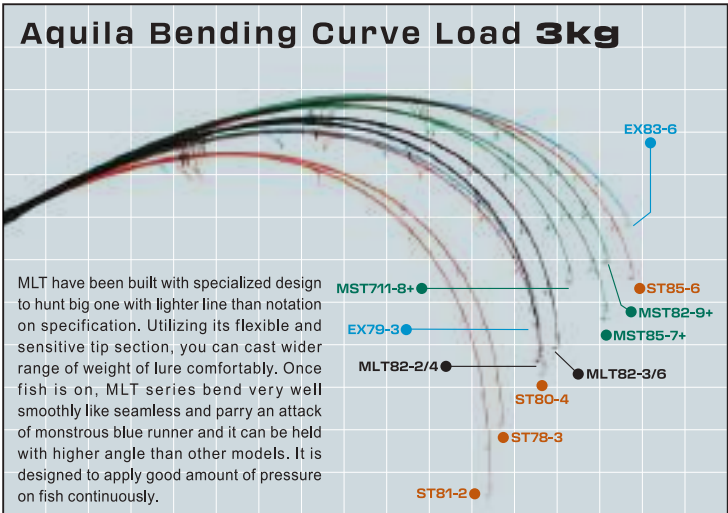

The Aquila EX series are the ultimate 3-piece expedition pack rod without compromises. Today, anglers are flying around the world to target their dream species and the farther you go, the more limitations there are regarding your luggage. Through countless trial and error, the Aquila EX series have now come to shape and ready to travel with you wherever you go. We have prepared a PE3 and PE6 class models for use with a vast range of lures with a super sharp feel to it. Although they are 3 piece models, it possesses a sharp feel to it and anglers will be able to bend and load the butt section of the rod to stop the monstrous targets. We are confident that these models will help you catch those rare species at the most remote areas around the world.

Aquila EX 79-3

The EX79-3 was designed with its sights on targets like the Cubera snapper, Roosterfish from Latin America and other exotic species that inhabit the various Amazon ponds in Asia. As you are limited with your tackle options when traveling the world, we have created this versatile rod for use with a vast range of lures from the large jig heads, poppers and diving pencils. The rod can be characterized as being a little stiffer compared to the ordinary grip joint rods, but it is a highly responsive rod also ideal for use in the casting game targeting the bonitos and yellowtails from smaller boats.

Aquila EX 83-6

The EX83-6 is a model ideal as a light tackle rod for the GT game or Kingfish game. Through the countless testing phases, we were able to come up with a "flexible" tip section which is extremely rare for pack-rods, enabling anglers to easily control their subtle action of middle size diving pencils. During the field-testing, the butt section was able to stop the run of the GT in shallow waters of 6m, while the rest of the rod was bending and absorbing the power of the angry GT. The rod has proven itself that it can be one of your trusted main weapons for your exotic expeditions around the world.

*Static load comparison does not represent **all** rod characteristics such as repulsion force. There are individual differences in how the load is applied when actually bending the rod, so **please** use this as a guide only.

BIG TUNA

JAPAN Special

With the help and know-how of anglers and charter boat captains, our collective data has expanded and the evolution of tuna fishing has grown exponentially. We can confidently say that tuna species, domestically or internationally are the biggest and strongest targets we face today.

So what can Ripplefisher do to help as a manufacturer realize the anglers' dreams and challenges? What do anglers seek? These are questions we ask ourselves daily and through countless trial and error, the BIG TUNA series was developed.

Rod making is a continuous challenge and has allowed us to grow as a rod manufacturer. The “BIG TUNA” must be a series that will continue to effect anglers in the ever-changing environment and lead a path forward to the future.

We have upgraded and optimized these models to cater for the ever-changing needs and environment around us.

We did not simply make it more bendy nor make it cast farther than before. Rather, through the combination of various different materials of carbon sheets and unique taper design with underlying butt power, we were able to realize a rod capable of enduring extreme load while the recovery force lifting the fish from the deep.

We hope you feel our dedicated passion through the blanks of BIG TUNA series.

Power Category	Model	Line Class	Lure	Drag Max
Light Class	85F	PE3~6	18~120g	10kg/45°
Middle Class	87AS	PE5~8	40~150g	15kg/45°
	83	PE6~8	40~150g	15kg/45°
Heavy Class	86	PE8~12	40~160g	15kg/45°
	710 RT	PE8~12	40~160g	15kg/45°
Power Class	73	PE8~12	60~180g	18kg/45°
	76	PE8~12	60~180g	18kg/45°
	70	PE10~12	80~220g	18kg/45°

We have set the power category as follows in order for a more comprehensive understanding. The 86, 710RT, 73, 76, 70 are all in the same line max category however the 73, 76, 70 have been designed with a higher breakage point suited for targeting 200kg class fish which are in a different power category from 86 and 710RT. The 86 and 710RT models can be used in situations where a long cast is required or more sensitive action is required.

*Please note that aiming huge tuna over 100kg in rough conditions is dangerous. Regarding "models that are designed for extremely large bluefin tuna" such as BIG TUNA 73, 76, and 70, the explanations and specifications are written assuming that you have the appropriate physical strength, training, and experience. Thank you for your understanding.

The 85F, 87AS, and 83 models are also useful for targeting yellowfin tuna, and the standard is 85F for tuna size 50kg or less, and 87AS and 83 for tuna size 80kg or less. Please consider the lure size to be used, the line, the size of the tuna, and the lure appeal required, and choose a model. *Even though the maximum line value is the same, the set drag value will vary depending on the model, so please keep this in mind when choosing a rod.

*If you are looking for a lighter model than the BIG TUNA series, we also recommend the Aquila series' MLT82-3/6, MST85-7+ and MLT82-3/6 does not have as strong a butt power as the BIG TUNA series, but it has an achievement of catching tuna over 50kg during testing. This model is also recommended for those who want to cast small lures when using ultra-small bait patterns such as whitebait. MST85-7+ has a short length grip, allowing for faster and more agile casting. It has excellent long-distance casting performance, so it is recommended for both shooting to fish feeding on surface and luring out.

The rod design of the BIG TUNA series is color-coded with thread colors matching the power class on the left. Also, the model name is engraved on the spacer on the reel sheet of the grip.

BIG TUNA LINEUP

4 POWER CLASS

BIG TUNA 85F JAPAN Special Light Class

This is a model capable of being high sticked while also being able to cast small lures a great distance. Anglers will be able to utilize lures ranging from 18g-120g and line ranging from PE3-6. We have given this rod a wide range to deal with the high pressure from anglers as well as to induce bites when the Tuna are feeding on small baits. Although it is classed as a light rod in the lineup, you will be able to land 50kg Yellowfin and Bluefin Tuna.

BIG TUNA 87AS JAPAN Special Middle Class

As its name suggests, the AS (Accuracy Shoot) model is designed to accurately cast lures into the feeding fish. In addition to the steady blank kick-back after casting, we have equipped two RV guides on the butt enabling an extremely smooth line ejection from the reel through to the rod. The casting ability will support anglers when the feeding frenzy is far or in heavy conditions casting into the wind. It is not only able to cast large lures but the blank will also allow the use of small 40g size lures. This middle class rod will assist anglers with its taper design ideal to slowly but surely lift the fish from the deep while being able to high-stick the rod.

※If you prefer a more speedy fight (same size fish) we recommend the 83. (87AS is 1 rank lighter compared to the 83. Furthermore, the 87AS is a totally different model and design to the 87 which has been discontinued.)

BIG TUNA 83 JAPAN Special Middle Class

This model was developed with "lure control" and "fight" as its main focus, but it goes without saying that casting is also outstanding. It is a PE6-8 middle class rod not only able to pinpoint cast but also able to utilize small mouthed diving poppers and diving pencils required for an attack. You will be able to realize the evolution of our BIG TUNA series with its lightness and outstanding balance, allowing anglers to cast all day long. Furthermore, the bending point is set close to the body enabling anglers to easily bend in and capitalize on the butt power with little effort.

BIG TUNA 86 JAPAN Special Heavy Class

If you require long and accurate casting with a heavy class tackle, this 86 will be your choice. In comparison to your ordinary heavy tackle, the flexible tip on the 86 will allow for easier casting of smaller lures when the bait-fish are small though the Tuna are huge. The bending point (pivotal point) is closer to the body allowing anglers to take initiative during the fight.

BIG TUNA 710RT JAPAN Special Heavy Class

Compared to the characteristics of the original model, we have re-designed the model to suit the current tuna scene. Since we have designed the taper of the blank to be most productive in the butt section, anglers will be able to efficiently and effectively utilize the butt power to lift the tuna. It's not simply a more flexible model compared to its predecessor, but a highly well-balanced heavy class model able to effortlessly stimulate bites from casting top water lures while having the power to go head to head with the biggest of fish. This will be your ideal model if you are in situations where you need to cast lures all day long.

BIG TUNA 76 JAPAN Special Power Class

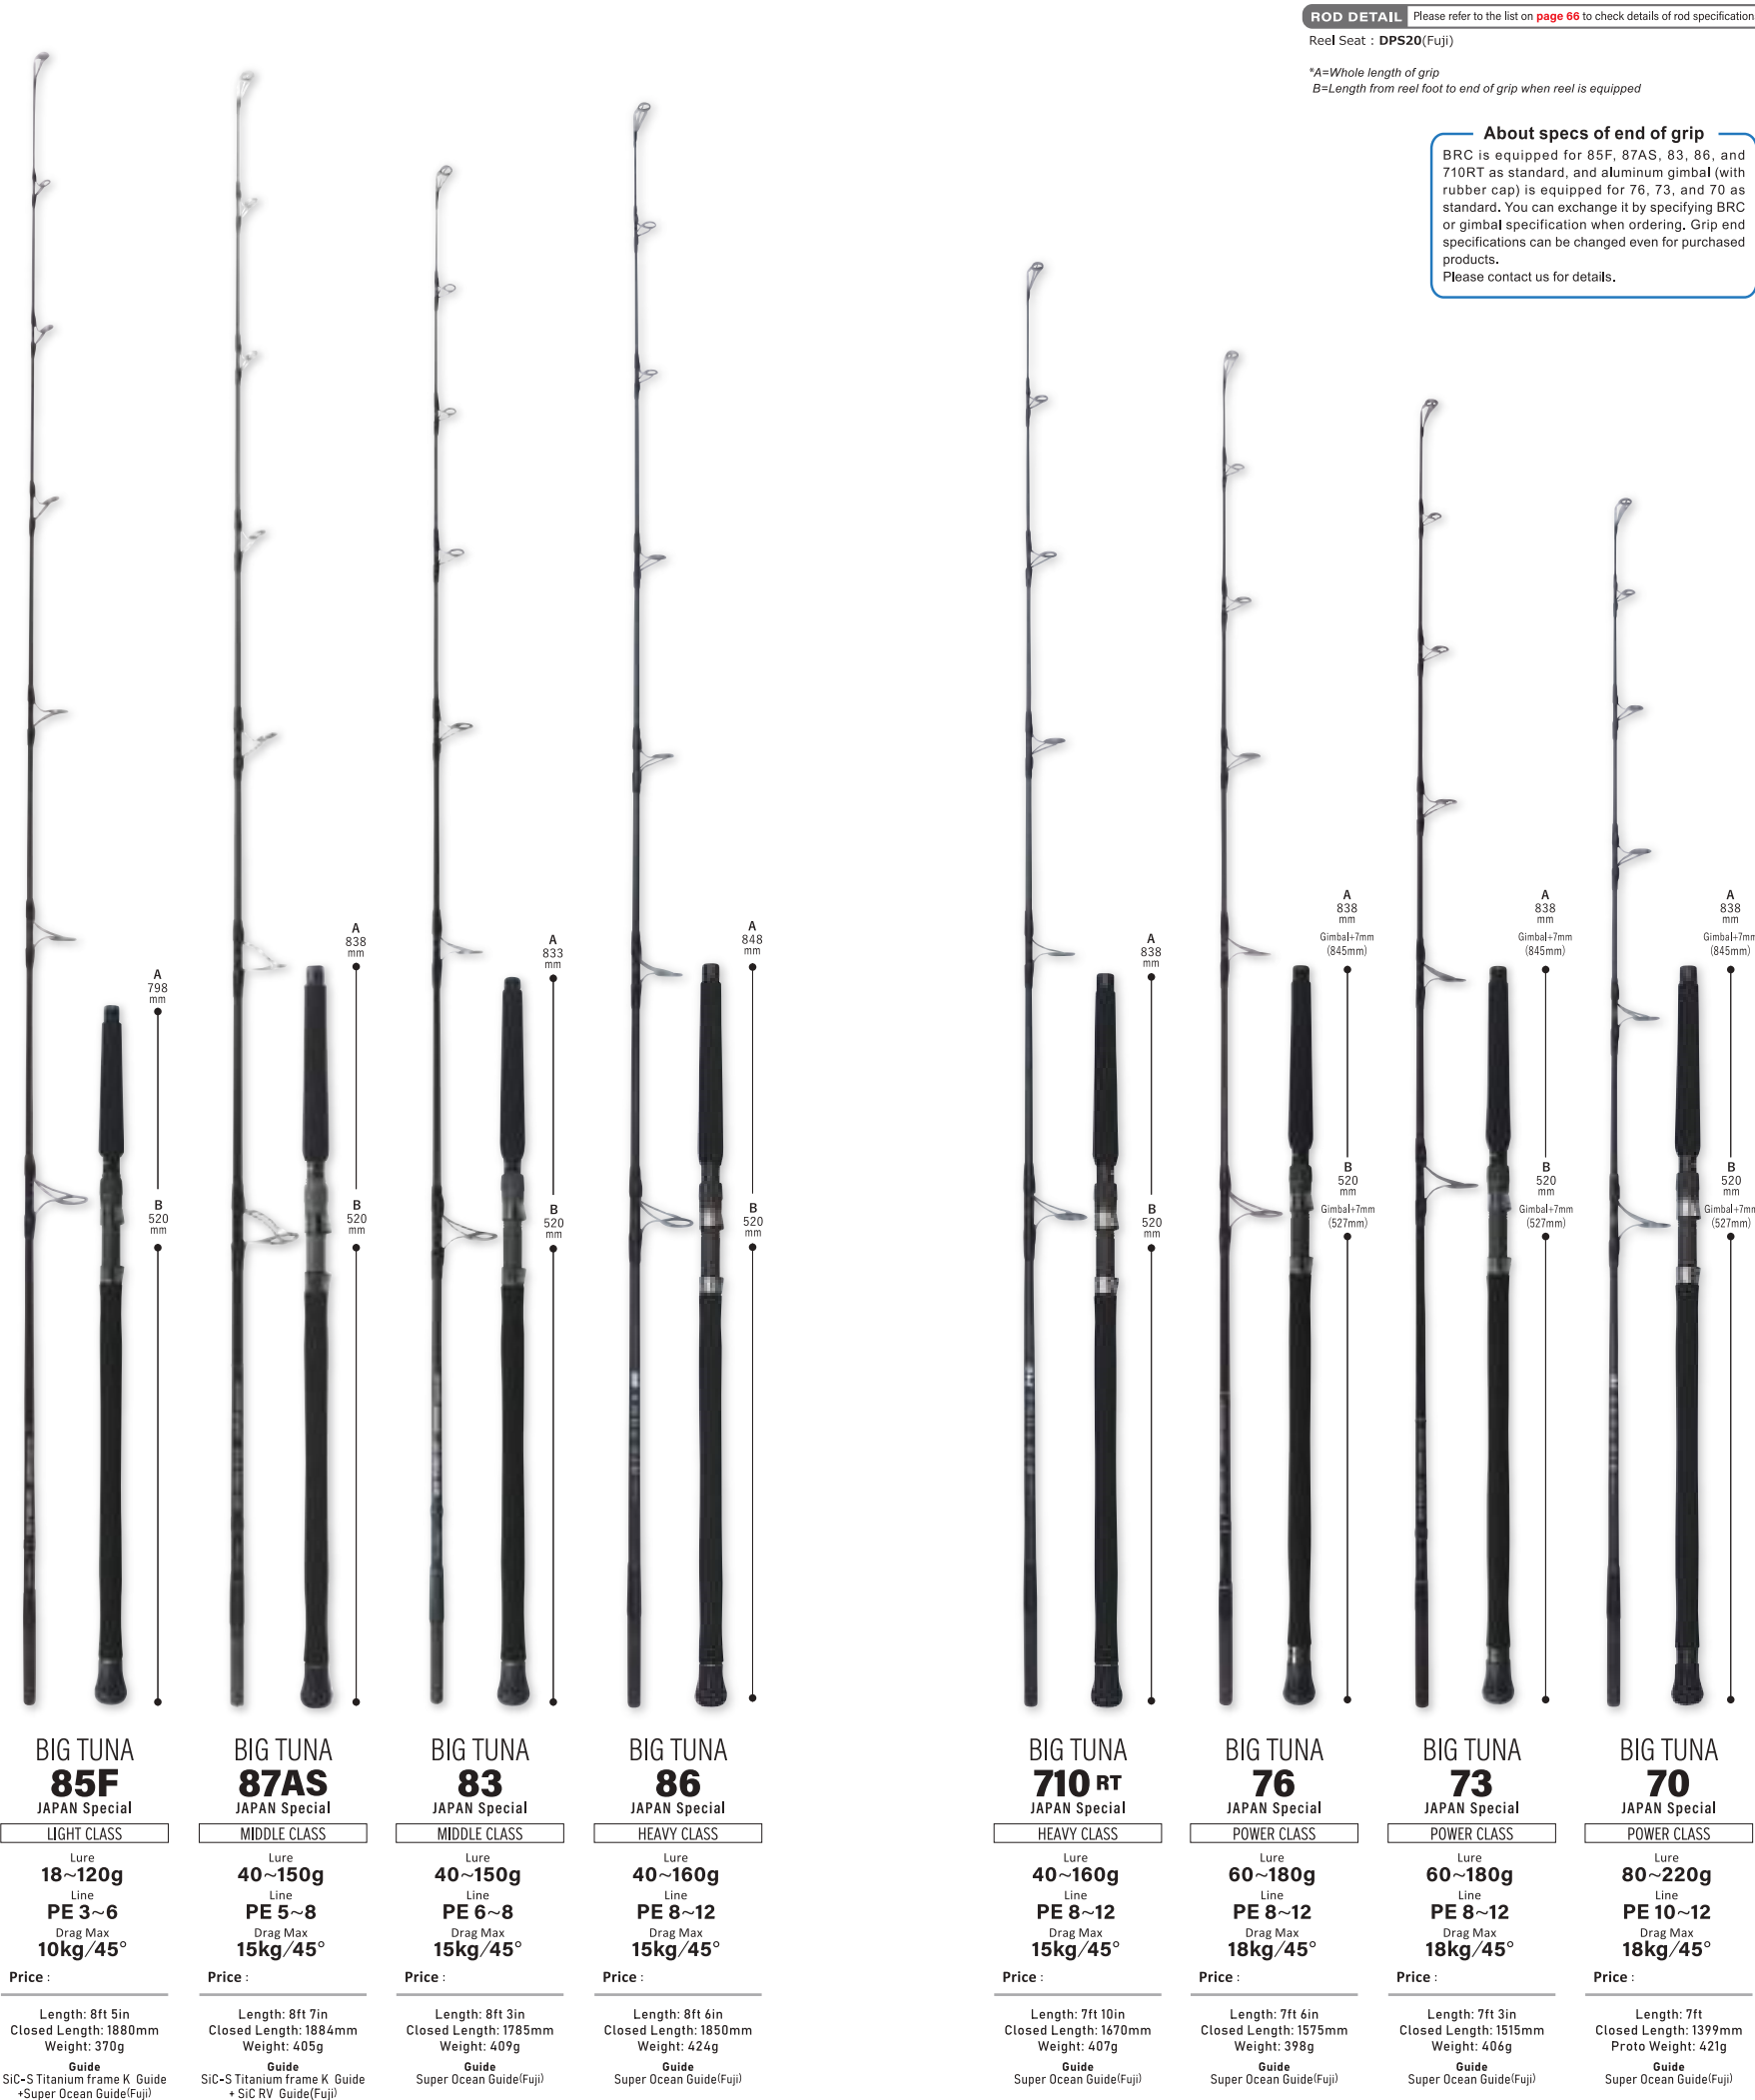

This model is for anglers with their sights on Blue-fin tuna weighing over 200kg. Similar to the 73, this 76 is capable of not only casting large lures mostly used when the targets are feeding on dolphin fish (mahi-mahi), but also allows anglers to cast and control the lighter (60g) sinking pencils for smaller baits. The difference from the 73 will be the contrasting fight style. While possessing strong butt power to constantly apply pressure on the fish, we have drastically reduced the load on the angler by bringing the bending point closer to the angler, allowing for a prolonged fight.

BIG TUNA 73 JAPAN Special Power Class

This model is for anglers with their sights on Blue fin tuna weighing over 200kg. Its castability is next to non, able to accurately hit feeding targets with large lures most productive when they are feeding on dolphin fish (mahi mahi). Being short in length and the stiffest model in the series, it is most suited for anglers who have confidence in their strength and ability to go head to head with the monstrous tuna.

BIG TUNA 70 JAPAN Special Power Class

This is for those anglers with their sights on super monstrous Blue-fin tuna. It is a model for anglers who need to "high-stick the rod" to load the blank or utilize the "straight pumping" fight style. The power of the rod is similar to the BT76 and BT73 but the breaking point is much greater compared to these two. With the shorter designed blank, the bending point is set closer to the body, drastically reducing the load and stress on the angler. It also has enough length and leverage to go around the bow or other obstacles on the boat for a smoother fight.

BIG TUNA Bending Curve

This comparison shows the bending characteristics of the Big Tuna series under static load, applied according to each power class, with the rod angle varied. Please use this as a reference for changes in the bend point and the amount of power remaining in the butt section.

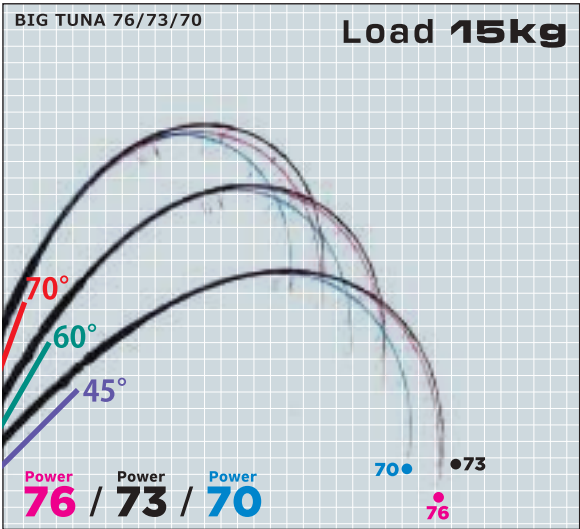

*Variations in bending angle caused by differences in rod length do not necessarily reflect differences in rod power.

The 85F and 87AS are more flexible able to cast small lures and designed for a more mellow fight with the fish, whereas the 83 and 86 are a more aggressive rod with the bending point towards the tip to efficiently lift and fight the fish. Compared with the same middle-class rods of 87AS, the 83 is a one rank stronger rod.

The illustration shows the comparison of the 2 heavy class rods. Both rods have a similar taper design but the difference lies in the length. By utilizing the length of the 86 blank, anglers will be able to cast farther than other shorter rods while the shorter 710RT is a model able to load the blank with the weight of the fish with ease.

The picture illustrates the comparison of the 3 power class models. When looking at the comparison with a 45 degree angle, the 73 and 76 look similar, however, the bending point of the 76 is closer to the **an**gle, reducing the stress on the **an**gle, while the 73 is further away enabling a more speedy fight against the fish. The 70 has the strongest butt power with the bending point being close to the **an**gle, drastically reducing the load on the **an**gle. The three models are the same power class, yet having **totally** different characteristics.

※when choosing a tuna rod, please be sure to choose the most suited rod depending on your height, weight, strength and experience.

SPIN-OFF FROM RIPPLEFISHER

OCEÁNICA

FOR UNRULY PASSIONATE ANGLERS

As the first release of the OCEÁNICA series, we have packed the stylish and excellent functionality envisioned by Ripple Fisher into the tubular-designed rod "OCEÁNICA-DFT" for "Stand-up tuna drifting", which is popular both in Japan and overseas. This will bring a new sensation and fresh air to this category where glass solids are the norm.

OCEÁNICA DFT61/PE6-8

Line: PE 6~8 Drag: Max 20kg/45°
Price:

This is a full tubular blank "Stand-up tuna drifting" rod that targets large yellowfin tuna to marlin. The DFT61/6-8 has a highly sensitive tip section that allows you to send bait to the school of fish, and a flexible belly section that bites well and has high hook-up ability even in severe conditions so that you won't miss any rare opportunities. It has a strong restoring force unique to tubular blanks and high lifting force that can keep the tuna controlling, but when loaded, it bends smoothly all the way to the handle, reducing the load and allowing for a stable fight even at high drag. The DFT61/6-8 is a mid-power rod with full torque and speedy fighting performance that allows you to directly feel the thrill of a standing fight.

Length: 6ft 1in(1866mm)
Weight: 595g
Guide: HBSG guide + butt guide RBSG guide(Fuji) Spiral guide setting

OCEÁNICA DFT61/PE6-8
Load 10kg & 15kg

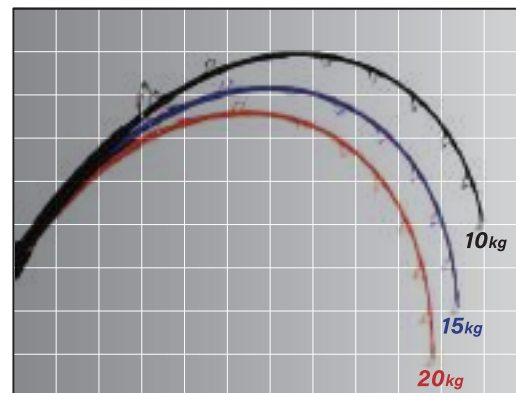

OCEÁNICA DFT511/PE12-15

Line: PE 12~15 Drag Max: 35kg/45°
Price:

The DFT511/12-15 was developed with a focus on super-large bluefin tuna over 200kg, and its aim was to provide the fighting performance to catch super-large bluefin tuna efficiently and in a short time. In addition to the strong force of recovery and high lifting power unique to tubular blanks, the butt section is reinforced with high-strength carbon material with high tension, making it a sturdy rod with the power to control even super-large sizes. Despite its overwhelming rod power, in order to minimize physical exhaustion, the fulcrum of the bending during the fight is placed at the angler's hand, and the tapered design allows the entire rod to bend and restore, making it easy to regain position even during long fights under ultra-high loads, allowing for a tenacious and stable fight until landing. The DFT511/12-15 is a standing swimming rod that combines Ripple Fisher's knowledge of big game fishing and design technology cultivated over many years at a high level for anglers who aim to reach the top and challenge records.

Length: 5ft 11in(1813mm)
Weight: 635g
Guide: HBSG guide + butt guide RBSG guide(Fuji) Spiral guide setting

OCEÁNICA DFT511/PE12-15
Load 10kg & 15kg & 20kg

Guide

Equipped with high-strength HBSG and RBSG guides. The spiral guide setting minimizes blank twist in the tip and belly sections when fighting with the rod held upright.

Grip

The foregrip features an extended EVA design. This length allows for a secure hold higher up on the rod when fighting vertically using a low-position belt, enabling the angler to maintain a comfortable and stable fighting posture.

Reel seat

Features a functional, chic original aluminum reel seat. Its aluminum components also serve as a guard, protecting the blank from scratches when secured in rod holders or clamp-on keepers.

Grip end

The butt section is reinforced with plain weave carbon to ensure high resilience and superior resistance to bending. This material choice also elevates the design with a refined, high-quality aesthetic.

Thread Pin-Color

●The "thread pin color custom" designs will comply with the original product's position.
*If two colors are used in the standard product, a single color will be used for the custom color.

*If you order a "thread pin color custom", the whole rod will be customized with the color you ordered.
*The thread color of the multi shaft cannot be changed.

Thread Pin custom Charge

Color: 01~07 **2,000 yen**

Color: 08 (No pin thread) **1,000 yen**

※Pin-Thread color custom is not available.
・RunnerExceed 100SHH LTD
・SilverStream BIG BAIT Series
・RF MORI / GAFF

Thread Set Color

●For custom thread set colors, you can choose the thread colors (for guides and butt section) from the following set colors. The set colors comprise of the main color and the sub color. We do not accept requests to change around the main color and sub color.

*Depending on the model of the rod, the color of the thread presented on top will differ if there is a under thread.
Please refer to the sample pictures on the right. (for the heavy game rods, there is a thread underneath the guides. For light to medium game rods, most models do not have this thread underneath the guides.)

*We do not accept requests to change or alter the color of the pin thread.
*The thread color of the multi shaft cannot be changed.

Thread Set Color custom Charge

・01~12 **5,000 yen**

※Thread Set-color custom is not available.

*The Massivo offers a lineup of sizes that can accommodate anglers with a solid build.

SPECIAL PRODUCTS

RippleFisher x MOONRAKERS

This is a collaboration with MOONRAKERS, the developers of MOON-TECH®—a material making waves for its "excessive functionality" (delivering overwhelming comfort, convenience, and durability) and the fervent support it has garnered from users. MOON-TECH® is a cutting-edge fabric derived from space technology originally developed to improve living conditions on the International Space Station. It boasts 12 high-performance features, including advanced odor control and stain resistance. The lineup includes both short-sleeve and long-sleeve models utilizing this advanced MOON-TECH® fabric.

RIPPLE FISHER 2026 ORIGINAL GEARS

RF Measure Release Mat Price:

- Size : 900×1740(mm)
- Weight : about 1600g
- accessories : stainless carabiner (ASANO)
- Material : Tarpaulin polyester

*Please use the measure only as a guide.

more detail

We developed the measuring mat for anglers targeting record breaking species off the rocks to safely and gently measure your catch for a smooth release. Once the fish is laid down on the mat, you can lift it by grabbing the handles on both sides. One half of the mat has a pocket shaped slot, so your fish will not slip off even on a slight angle. The inside of the pocket has a drainage hole, so it is easy to dry and keep clean after your fishing trips. We paid extra attention for designing the handle section so anglers will be able to lift the fish weighing around 70kg.

RF GRIZZLE POWERED GLOVE

Price:

- Size : M • L • LL • Massimo 3L

Ripple Fisher original fishing gloves. By using NanoFront material, which has excellent durability, grip, and fit, and by placing anti-slip rubber, we have created a stronger grip for big targets. The material itself is thin and flexible, making it useful in a variety of situations, both offshore and shore.
